Spray Specification for The Home Depot

For best results **DRYLOK Extreme** should be well stirred and sprayed at room temperature (70°F and 60% relative humidity). Conditions of high humidity and/or low temperature can cause poor results. It is recommended that a small test area be done before beginning the project.

Spray Recommendation:

Use Graco Magnum Pro X9 (Graco P/N 261820; HD item 935-415; Internet# 100634360)

Remove Gun filter prior to spraying. Use Graco RAC IV 619 tip (Graco P/N 221619; HD item 334-185; Internet#100113713). Spray pressure 2200 to 2500 psi. Hold gun twelve inches from surface when spraying. Spray cross hatching patterns (North/South then East/West) with two coats building to a 14 to 16 wet mil thickness. First coat, back roll with ¾” nap or back brush to fill any pinholes or pores in masonry. Allow to dry 4 hours before applying second coat. Repeat first coat procedure.

For Commercial Applications:

Use Grace Pro210ES (Graco P/N 17D163; HD item 1001263425; Internet#205851162) or larger output (Graco P/N 17C305)

Remove Gun and Manifold filters prior to spraying. Use Graco RAC IV 619 tip (Graco P/N 221619; HD item 334-185; Internet#100113713). Spray pressure 2200 to 2500 psi. Spray cross hatching patterns (North/South then East/West) with two coats building to a 14 to 16 wet mil thickness. First coat, back roll with ¾” nap or back brush to fill any pinholes or pores in masonry. Allow to dry 4 hours before applying second coat. Repeat first coat procedure.
